**Subject:** RE: Update on new wells?

Hi Treasure, no you didn't miss an email and we must be on the same wavelength, as I have an update in progress. Five wells have been screened in weathered shale, per below. All encountered water but W-13 which remains dry. The other dry notation below is W-8 which was drilled in Phase 1. I will have a more detailed summary to you tomorrow.

Could you could please provide an update on the new wells that were planned for the southern boundary of the Comanche facility? I apologize if you've already provided an update and I missed it while I was out on leave; I'm still catching up!

Please reply all with your response.

Thank you,

Treasure
